**GAME MODES**

**Story Mode**

Story Mode is for 1 player only and follows the storyline of the game. You can choose to play as any hero, but once you've chosen a hero you must play as that character for the length of the game.

**Battle Mode**

Battle Mode is for 1 or 2 players and allows you to play as any hero or as a villain! Instead of following the order of the story, the computer pits you against randomly chosen opponents.

**Versus Mode**

Versus Mode lets you and a friend battle against each other as any hero or villain—even as the same one! If you both choose the same character, they will appear with different color schemes to help you tell them apart. Player 1’s character appears on the left of the screen, Player 2’s on the right. In Versus Mode, both players can select how powerful their character is, allowing for either a fair match-up or a one-sided beating. The level of power is displayed by the number of jewel buttons present below the player icons (P1 and P2), with one representing the weakest power level and five the strongest. Press LEFT or RIGHT on the CONTROL PAD to set the desired power level.

Between rounds, you can select the location you wish to battle in by highlighting the level select and pressing LEFT or RIGHT on the CONTROL PAD to scroll through to the desired location. Press the START BUTTON to begin fighting in that location.
Once a player has defeated his opponent twice, a results screen will appear, showing each player’s record. Records appear as the number of Wins, Losses and Draws.

OPTIONS
You may choose from 3 play options. To set a given option, press UP or DOWN on the CONTROL PAD to highlight it. When you are satisfied with your settings, press the START BUTTON to return to the title screen and begin game play.

Difficulty:
The level of play difficulty is displayed by the number of jewel buttons present, with one representing the easiest skill level and five the hardest. Press LEFT or RIGHT on the CONTROL PAD to set the desired difficulty level.

Time Limit:
Press LEFT or RIGHT on the CONTROL PAD to turn the timer for rounds ON or OFF. When playing a timed round, you have 99 seconds to score a victory. If no player has defeated the other in the allotted time, the victory goes to the player with the most energy remaining. When the Timer is OFF, a round continues indefinitely until one player defeats another.

Button Configuration
You may change which buttons control which movements on your controller by highlighting this option and pressing UP or DOWN on the CONTROL PAD to move the cursor next to the desired move. Then press the button you wish to correspond to that move. Continue until your controller is configured to your liking.

CONTINUING
If you’ve been defeated, a screen appears asking if you wish to continue playing. You have 9 seconds to decide. To Continue, press the START BUTTON before the timer has counted down. Otherwise the Game Over screen will appear, ending the current game session.
Select which character you wish to play as by using the CONTROL PAD to move the cursor to the desired hero’s symbol or villain’s portrait. Note that in Story mode, you may only select from **Justice League Task Force** characters. In all other modes, you may play as any hero or villain. Press any button to begin play.
Each of the nine characters have their own unique grab attacks. To perform these, walk towards your opponent closely and press the MEDIUM or STRONG PUNCH or KICK buttons. Try each one – they are lethal!
